

**REQUEST FOR CONSULTANT QUALIFICATIONS  
REHABILITATION OF THE BLAIR COVERED BRIDGE  
OVER THE PEMIGEWASSET RIVER – CAMPTON, NH**

ADDENDUM #1  
July 9, 2009

Clarifications to the Request for Consultant Qualifications (RFQ) to completely rehabilitate the Blair Covered Bridge over the Pemigewasset River.

1. RFQ is to request qualifications for selecting a consultant. The RFQ title is “Request for Qualifications Design Build Rehabilitation of the Blair Covered Bridge” and uses the term “Design/Build”. (See proposal request item no. 4). Ignore these two references to design/ build in the RFQ. Remove item no. 4.
2. Design/build may be a process selected after completing the preliminary design by the consultant. The consultant selected by the Town to prepare preliminary design, is eligible to be part of a design/build team and design/build proposal at a later date, and will not be prohibited from being part of design/build teams.
3. The RFQ directs all inquires to Anne Marie Foote, in writing, sent by fax will be received until July 14th. Reasonable inquires will be answered thru an addendum posted on Campton’s Web Site on or before July 16<sup>th</sup>..
4. An “Architect-Engineer Qualifications” form is included in the RFQ. Consultants are supposed to complete this form and submit it with the proposal.
5. No one has been selected to complete the emergency repairs referenced in the Attachment 1.
6. Campton has received assistance from NHDOT and others.
7. Campton for this phase is looking for a “Consultant Engineering Firm” if a contractor is included on its team as an advisor, which Campton encourages. That contractor still can bid on the project as a design/builder. If the project proceeds with Design/Bid/Build the contractor will have to be removed from the team for the Final Design Phase in order to bid the project.
