

HELP NEEDED!

Hello Central New Hampshire,

Central NH is in great need of volunteers to support our regional emergency response plan.

Volunteers are needed for Core Staff <http://cnhnp.org/program/emergency-planning> , Community Emergency Response Team (CERT), and Medical Reserve Corps (MRC)

<http://cnhnp.org/program/medical-reserves-corps-mrc-community-emergency-response-team-cert/>. Volunteer community members and health professionals contribute their skills and expertise in response to threats of terrorism, public health emergencies, and other community needs to enhance the regional public health medical and public safety emergency response capability. For example, over 100 volunteers are needed to open one Point of Dispensing (POD) site to respond to a regional emergency that requires dispensing some kind of medication (like a regional influenza pandemic).

We invite you to become involved, as one of the many volunteers who make a vital difference in our community's emergency readiness and response.

Please join us: Wednesday, **January 31 (6:00)** for an informational session and FREE pizza in the Training Room of the **Ashland Fire Station**, 9 Main Street, in Ashland.
